

Sauver.Office

Sauver.Office is a complete Office Suite which can be used for all office activities.

Sauver.Office comes with a word processor, spreadsheet, graphics, presentation, database and various other solutions.

Sauver.Office is easy to learn, and if you're already using another office software package, you'll take to Sauver.Office straight away. It stores all your data in an international open standard format and can also read and write files from other common office software packages.
