

## Windows Specific Software

Additional Softwares for Windows Operating System :

These Softwares are made specially for the Windows Operating System.

Reason : All the Operating Systems have Similar Softwares

{tab=Saver.ClipBoard}

ClipBoard Monitoring Software with ability save copied image directly, get the previous clips back. It stores clipboard history, and allows you to link clipboard contents to application actions.

It Consists of various plugins through which you can make a Zip File of the copied files. Or you can Edit the copied image and save it directly to the clipboard or as a file.

{tab=Saver.Note}

Saver.Note is a new concept of writing and managing notes. The aim of Saver.Note is to make an easy and useful interface, which would allow any computer users. Note doesn't necessary to be just few lines of text. Appointment, reminders, task, contacts, secret information can be treating as notes. Saver.Note is the future for all these necessities in a single interface.

Features :

- Auto Save: It saves the note automatically if the note is modified by the user. User may choose not to auto save from the options.
- Version Control: Saver.Note manages version history of the notes. Every time a saved note is opened will save in a new version. User can view the version history from the Saver.Note Manager. The manager will inform the user how many versions are available or the note. User can view any previous version of the note from the note history. User can rollback to any previous version.
- Auto Delete Empty Note: Saver.Note deletes empty note automatically.
- Note Status: Saver.Note saves the status of the note when it is saved and opens with the last status it was saved. If the Saver.Note closes without closing the note then the opened notes will be re-opened next time. If the note was collapsed then it will be opened with collapsed status. It will return the status of the tool bar user last used.
- Tool Bar: Saver.Note provides complete editing tool bar. It also supports all the editing with the menu. User can select font with color from the the font menu.
- Always On Top Button: Always on top is an useful option in Saver.Note. So, in Saver.Note 2.0 it is in a button at to top of the note.
- Transparency: You can make your Saver.Note transparent from the icon->view->Transparency. A transparency slider bar will help you to make your note transparent.

{tab=Saver.Snapshot}

Saver.Snapshot is a simple software for taking screenshots. It is capable of capturing images of the whole desktop, or a selected region or a selected window. The images can then be saved in a variety of formats.

{tab=Saver.Safe}

Today you need to remember many passwords. You need a password for the Windows network logon, your e-mail account, your homepage's ftp password, online passwords etc. etc. etc. The list is endless. Also, you should use different passwords for each account. Because if you use only one password everywhere and someone gets this password you have a problem... A serious problem. The thief would have access to your e-mail account, homepage, etc. Unimaginable.

Saver.Safe is a password manager or safe which helps you to manage your passwords in a secure way. You can put all your passwords in one database, which is locked with one master key or a key-disk. So you only have to remember one single master password or insert the key-disk to unlock the whole database. The databases are encrypted using the best and most secure encryption algorithms currently known (AES and Twofish).

{tab=Saver.Notepad}

Saver.Notepad is a text editor with special features for the Coders. Saver.Notepad is able to identify in which language you have written the code and makes the specific coding style as per the International Coding Standards.

Sauver.Notepad also features auto-complete feature. It supports almost all the programming languages.
