

Sauver Release Announcement

Sauver Release Announcement

DATELINE June 5, 2007

FOR IMMEDIATE RELEASE

June 5, 2007 (The INTERNET). The Sauver Company today announced the release of the new Website, New Range of Products and an important update to it's Sauver Operating System.

Sauver Website

Sauver website has been re-designed, re-configured right from scratch to provide better usability and visuals.Sauver - The Complete Operating System

SauverOs - Sauver's Operating System has been updated to version 2.0 with new interface, new visual designs, and more professional. The Operating System is now based on the latest Linux kernel with better hardware support and performance. SauveOs now has a new Icon theme, Visual colours have also gone a major change.Sauver.Office

Sauver.Office - The latest product from Sauver. A complete Office solution with a word processor, spreadsheet, presentation, and database solution. The Office Suite is a Multi - Platform Office Suite that means it can work on various Operating Systems. We have provided extra softwares for the Windows Operating System cause of lack of availability on the same. About Sauver

Sauver is a Software development organisation. Developing softwares which are used on a daily basis. Sauver creates Softwares that are branded to their client's name thus creating a BRAND for them. It is an organisation started by Maulik Gordhandas.Credits

Special Thanks to N.W.D.Co. for providing the webspace.
